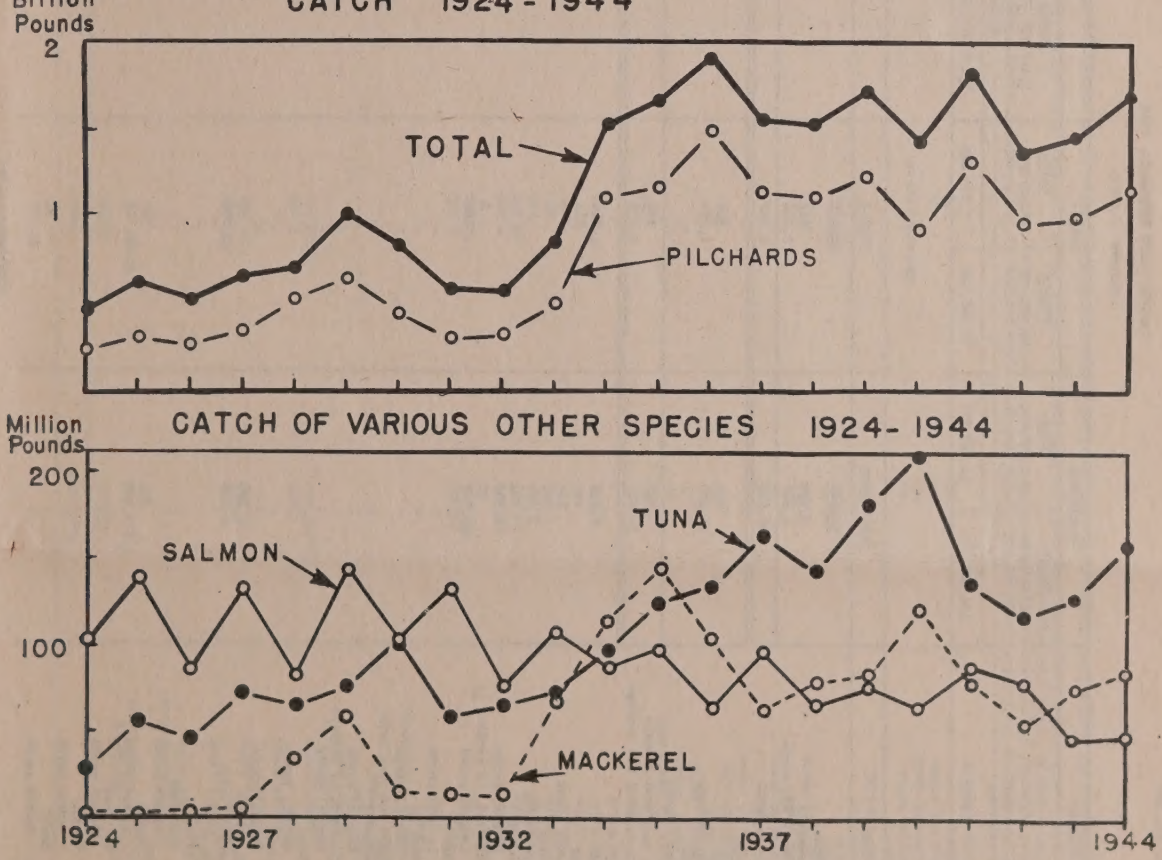
PACIFIC COAST FISHERIES -1944

Department of the Interior
Fish and Wildlife Service

Division of Commercial Fisheries
Washington 25, D. C.

C. F. S. No. 332 17969 Annual Summary

FISHERIES OF WASHINGTON, OREGON AND CALIFORNIA
CATCH 1924 - 1944



CATCH OF VARIOUS OTHER SPECIES 1924- 1944

The commercial catch of fishery products in the Pacific Coast States totaled 1,667,793,700 pounds in 1944, an increase of 15 percent over the previous year. Catches of pilchards, tuna, mackerel, and salmon were all more than in 1943. The amount received by the fishermen for the 1944 catch surpassed that of 1943 by 4 percent and was the largest on record, totaling $59,801,692. The value of the 1943 catch was $57,322,690.

PACIFIC COAST FISHERIES, 1944

Summary of catch

17989

Product	Washington		Oregon		California		Total	
	Pounds	Value	Pounds	Value	Pounds	Value	Pounds	Value

Abalone outfits	-	-	25	25

1/ Used chiefly in the sardine fishery of California. Only one vessel operated in the Washington pilchard fishery and none operated in Oregon.
2/ Used primarily for catching mackerel, barracuda, yellowtail, and miscellaneous market fish.
3/ Fished only on Indian reservation.
4/ Includes only vessels that fished exclusively for tuna and did not troll for salmon. Many of the salmon trollers also trolled for tuna.

NOTE:--Data on the Pacific Coast fisheries have been obtained largely from records compiled by the individual State Fishery Departments.

1/ Includes the catch taken off Latin America. 2/ The catch of grayfish in California is included with other sharks.

Note:--Prior to 1941, the poundage of halibut, sablefish, lingcod, and rockfishes reported for Washington and Oregon represented the dressed weight of the fish landed. Beginning with the data for 1941, all catch statistics are shown in round weights. The landed weight of lingcod, sablefish, and rockfishes (except in the otter trawl fisheries in which the fish are landed round) was converted to round weight by multiplying the dressed weight by the factor 1.43. The factor used to convert halibut from marketed weight was 1.33.

The poundage and value of the catch shown for Washington and Oregon include 7,752,046 pounds of fish livers and viscera, valued at $7,170,092 to the fishermen. Comprising this total were: cod livers, 48,508 pounds, $3,881; grayfish livers, 5,445,831 pounds, $2,428,579; halibut livers, 222,759 pounds, valued at $288,536; lingcod livers, 410,239 pounds, $827,959; ratfish livers, 364,506 pounds, $18,225; rockfish livers, 33,204 pounds, $23,292; sablefish livers, 113,892 pounds, $172,074; skate livers, 7,322 pounds, $366; soupfin shark livers, 589,567 pounds, $3,227,840; and halibut, lingcod, and sablefish viscera, 516,218 pounds, $179,340. Similar data for California are not available. Most of the carcasses of dogfish and soupfin shark were not landed, but were discarded at sea after removal of the livers.
